

Highlights of the 2025 Premier Formulary are shown below. A formulary is a list of drugs that are included in your prescription drug plan. The following is not a complete list of prescriptions, over the counter (OTC) medications, or prescription medical supplies that are on the formulary. Additionally, inclusion on this list does not guarantee coverage since your specific plan parameters supersede the formulary (i.e., some plans may not cover fertility or weight loss medications, and those medications may appear on this list). Please refer to your benefit materials on your specific plan parameters.

Please be aware that changes to the formulary can occur throughout the year. If a formulary change impacts you, you will be notified via mail approximately 60 days before the change is made to reduce medication disruption. In general, if a brand name medication has an available generic, the brand name will be non-preferred or excluded from the formulary.

Please check your benefit materials for the specific drugs covered and the copayments for your prescription plan. For specific questions about your coverage, please call the phone number printed on your member ID card.
